Material declaration - REACH Regulation (EC) No. 1907/2006

Dear Sir or Madam,

thank you for your inquiry regarding compliance with REACH regulation (EC) No. 1907/2006. In our own interest and against the background of a high level of delivery and product safety, we take the REACH information obligations very seriously.

We confirm that the substance limitations and prohibitions applicable to the materials are complied with in accordance with REACH regulation No. 1907/2006, Annex XVII and Annex XIV, as amended.

Furthermore, we confirm that our articles do not contain any of the **240** substances (as of **January 23, 2024**) on the REACH candidate list at a concentration of more than 0.1 % by weight - with one exception: lead may be a component of our materials used (in brass up to 4% Pb or in high temperature solder with more than 85 % Pb). Please enquire about the current status of individual fuses at applikation@siba.de. We make a regular check of the candidate list after renewed updating. Our suppliers are also requested via the purchase orders to fulfill their duty of information according to Art. 33. The SCIP database is maintained by us.

We have provided all information to the best of our knowledge and belief. They correspond to the current state of the art. We hope that we have answered your inquiry to your satisfaction. Should you have any further questions, please do not hesitate to contact us.

Yours sincerely

SIBA GmbH
